Volume Contents

Number 1. January

1 **Metabolic Regulation during Glyceollin Biosynthesis in Green Soybean Hypocotyls**—Janice A. Kimpel* and Tsune Kosuge

8 **Red Light Stimulates an Increase in Intracellular Calcium in the Spores of *Onoclea sensibilis***—Randy Wayne* and Peter K. Helper

12 **Biosynthesis of Cytidine 5′-Diphosphate-diacylglycerol in Endoplasmic Reticulum and Mitochondria of Castor Bean Endosperm**—Kathryn F. Kleppinger-Sparace and Thomas S. Moore, Jr.*

16 **Abscisic Acid and Cutout in Cotton**—Gene Guinn*

21 **Quantifying Apoplastic Flux through Red Pine Root Systems Using Trisodium, 3-hydroxy-5,8,10-pyrenetrisulfonate**—Paul J. Hanson*, Edward I. Sucoff, and Albert H. Markhart, III

25 **Abscisic Acid Accumulation in Spinach Leaf Slices in the Presence of Penetrating and Nonpenetrating Solutes**—Robert A. Creelman and Jan A. D. Zeevaart*

29 **Light Quality Effects on Corn Chloroplast Development**—Kenneth Eskins*, Murray Duysen, Linda Dybas, and Susan McCarthy

35 ***Agrobacterium tumefaciens* Interaction with Suspension-Cultured Tomato Cells**—Nicola T. Neff* and Andrew N. Binns

43 **Inhibition of the K^+-Stimulated ATPase of the Plasmalemma of Pinto Bean Leaves by Ozone**—Peter J. Dominy and Robert L. Heath*

46 **Proton-Translocating Inorganic Pyrophosphatase in Red Beet (*Beta vulgaris* L.) Tonoplast Vesicles**—**Philip A. Rea* and Ronald J. Poole**

53 **Relationship between Ureide N and N_2 Fixation, Aboveground N Accumulation, Acetylene Reduction, and Nodule Mass in Greenhouse and Field Studies with *Glycine max* L. (Merr.)**—Peter van Berkum*, Charles Sloger, Deane F. Weber, Perry B. Cregan, and Harold H. Keyser

59 **Crassulacean Acid Metabolism and Crassulacean Acid Metabolism Modifications in *Peperomia camptotricha***—Deborah L. Sipes and Irwin P. Ting*

64 **Effect of Chilling Temperatures upon Cell Cultures of Tomato**—Frances M. DuPont*, Lisa C. Staraci, Becky Chou, Bruce R. Thomas, Bill G. Williams, and J. Brian Mudd

69 **Preparation of Membrane Vesicles Enriched in ATP-Dependent Proton Transport from Suspension Cultues of Tomato Cells**—Frances M. DuPont* and Maria de Gracia Zabala

74 **Acclimation to Low Temperature by Microsomal Membranes from Tomato Cell Cultures**—Frances M. DuPont* and J. Brian Mudd

79 **Effect of Water Stress on the Carbohydrate Metabolism of *Citrullus lanatus* Seeds during Germination**—Frederik C. Botha* and Johannes G. C. Small

83 **Photosynthetic Carbon Assimilation in a Shootless Orchid, *Chiloschista usneoides* (DON) LDL. A Variant on Crassulacean Acid Metabolism**—William Cockburn*, Chong Jin Goh, and Popuri Nageswara Avadhani

87 **Genotypic Variability of Soybean Response to *Agrobacterium* Strains Harboring the Ti or Ri Plasmids**—Lowell D. Owens* and Dean E. Cress

95 **Spectral Dependence of Photoregulation of Inorganic Nitrogen Metabolism in *Chlamydomonas reinhardii***—Maria P. Azuara and Pedro J. Aparicio*

99 **Cytokinin-Modulated Gene Expression in Excised Pumpkin Cotyledons**—Chond-maw Chen* and Scott M. Leisner

104 **Leaf Carbohydrate Status and Enzymes of Translocate Synthesis in Fruiting and Vegetative Plants of *Cucumis sativus* L.**—David M. Pharr*, Steven C. Huber, and Harriet N. Sox

109 **Purification and Characterization of Extracellular Pectinesterases from *Phytophthora infestans***—Helga Förster* and Ihab Rasched

113 **Comparative Water Relations of *Phaseolus vulgaris* L. and *Phaseolus acutifolius* Gray**—Albert H. Markhart, III*

118 **Stoichiometry of Proton Translocation Coupled to Substrate Oxidation in Plant Mitochondria**—François Moreau* and Jacques Davy de Virville

124 **Spinach Nitrate Reductase. Purification, Molecular Weight, and Subunit Composition**—Hiroki Nakagawa*, Yasuhiro Yonemura, Hiroyasu Yamamoto, Takahide Sato, Nagao Ogura, and Ryo Sato

129 **^{15}N and ^{13}C NMR Determination of Allantoin Metabolism in Developing Soybean Cotyledons**—George T. Coker, III* and Jacob Schaeffer

136 **Effect of pH on Orthophosphate Uptake by Corn Roots**—Hervé Sentenac and Claude Grignon

142 **Economy of Water, Carbon, and Nitrogen in the Developing Cowpea Fruit**—Mark B. Peoples*, John S. Pate, Craig A. Atkins, and David R. Murray

148 **Diurnal Water Balance of the Cowpea Fruit**—John S. Pate*, Mark B. Peoples, Aart J. E. van Bel, John Kuo, and Craig A. Atkins

157 **Permeability of the Suberized Mestome Sheath in Winter Rye**—Carol A. Peterson, Marilyn Griffith, and Norman P. A. Huner*

162 **Studies of Root Function in *Zea mays*. III. Xylem Sap Composition at Maximum Root Pressure Provides Evidence of Active Transport into the Xylem and a Measurement of the Reflection Coefficient of the Root**—David M. Miller*

168 **Studies of Root Function in *Zea mays*. IV. Effects of Applied Pressure on the Hydraulic Conductivity and Volume Flow through the Excised Root**—David M. Miller*

175 **Transient Nature of a (1→3), (1→4)-β-D-Glucan in *Zea mays* Coleoptile Cell Walls**—Diana G. Luttenegger and Donald J. Nevins*

179 **Inhibition of HCO_3^- Binding to Photosystem II by Atrazine at a Low-Affinity Herbicide Binding Site**—Alan Stemler* and Judith Murphy

183 **Maintenance Carbon Cycle in Crassulacean Acid Metabolism Plant Leaves. Source and Compartmentation of Carbon for Nocturnal Malate Synthesis**—William H. Kenyon, Ray F. Severson, and Clanton C. Black, Jr.*

190 **Inhibitory Effects of Water Deficit on Maize Leaf Elongation**—Elizabeth Van Volkenburgh* and John S. Boyer

195 **Strongly Acidic Auxin Indole-3-Methanesulfonic Acid. Synthesis of [^{14}C]Indole-3-Methanesulfonic Acid and Studies of Its Chromatographic, Spectral, and Biological Properties**—Jerry D. Cohen*, Bruce G. Baldi, and Krystyna Bialek

200 **Electrogenic Transport of Protons Driven by the Plasma Membrane ATPase in Membrane Vesicles from**

Radish. Biochemical Characterization—Franca Rasi-Caldogno*, Maria Chiara Pugliarello, and Maria Ida De Michelis

206 **Inositol and Sugars in Adaptation of Tomato to Salt**—Robert F. Sacher* and Richard C. Staples

211 **Proteins and Peroxidase in Callus and Suspension Cultures of Apple. A Study Using Ultrathin-Layer Isoelectric Focusing, Sensitive Silver Staining of Proteins, and Peroxidase Isozyme Visualization**—Ralf G. Berger, Friedrich Drawert*, Angelika Kinzkofer, Christa Kunz, and Bertold J. Radola

215 **Virulence Properties of Strains of *Agrobacterium* on the Apical and Basal Surfaces of Carrot Root Discs**—Maarten H. Ryder*, Max E. Tate, and Allen Kerr

SHORT COMMUNICATIONS

222 **Onset of Alcohol Dehydrogenase Synthesis during Microsporogenesis in Maize**—Jeffrey Stinson and Joseph P. Mascarenhas*

225 **Initiation of Postmeiotic β-Galactosidase Synthesis during Microsporogenesis in Oilseed Rape**—Mohan B. Singh*, Patricia M. O'Neill, and R. Bruce Knox

229 **Effect of Ferredoxin on the Diaphorase Activity of Cyanobacterial Ferredoxin-NADP Reductase**—H. Melamed-Harel, E. Tel-Or*, and A. San Pietro

232 **Immunochemical Characterization of Nitrate Reductase Forms from Wild-Type (cv Williams) and nr_1 Mutant Soybean**—Paul Robin, Luc Streit, Wilbur H. Campbell*, and James E. Harper

237 **Photosynthesis and Inorganic Carbon Accumulation in the Acidophilic Alga *Cyanidioschyzon merolae***—Drora Zenvirth, Micha Volokita, and Aaron Kaplan*

240 **Conditions for Strict Autotrophic Culture of Tobacco Callus**—Neil A. McHale*

243 **Laboratory-Produced CO_2 Calibration Gases**—Herbert Zvi Enoch*

245 **Foliar Sterols in Soybeans Exposed to Chronic Levels of Ozone**—Claus Grunwald* and Anton G. Endress

248 **Blue and Green Light-Induced Phototropism in *Arabidopsis thaliana* and *Lactuca sativa* L. Seedlings**—Benjamin Steinitz, Zhangling Ren, and Kenneth L. Poff*

252 **Correction**

Number 2. February

253 **Inorganic Carbon Uptake by *Chlamydomonas reinhardtii***—James V. Moroney* and N. Edward Tolbert

259 **Ice Nucleation Temperature of Individual Leaves in Relation to Population Sizes of Icek Nucleation Active Bacteria and Frost Injury**—Susan S. Hirano*, L. Stuart Baker, and Christen D. Upper

266 **Allocation and Turnover of Photosynthetically Assimilated $14CO_2$ in Leaves of *Glycine max* L. Clark**—Takeshi Kagawa* and Joshua H. H. Wong

275 **Endogenous Rhythms in Photosynthesis, Sucrose Phosphate Synthase Activity, and Stomatal Resistance in Leaves of Soybean (*Glycine max* [L.] Merr.)**—Phillip S. Kerr*, Thomas W. Rufty, Jr., and Steven C. Huber

281 **Light-Dependent Oxygen Uptake, Glycolate, and Ammonia Release in L-Methionine Sulfoximine-Treated *Chylamydomonas***—Gilles Peltier* and Pierre Thibault

285 **Effect of Path or Sink Anoxia on Sugar Translocation in Roots of Maize Seedlings**—Pierre H. Saglio*

291 **Transport and Metabolism of 1′-Fluorosucrose, a Sucrose Analog Not Subject to Invertase Hydrolysis**—William D. Hitz*, Mark R. Schmitt, Peter J. Card, and Robert T. Giaquinta

296 **Characterization of Peroxisomes from the Alga *Bumilleriopsis filiformis***—Wolfgang Gross, Uwe Winkler, and Helmut Stabenau*

300 **Detecting Photoactivation of Phosphoenolypyruvate Carboxylase in C_4 Plants. An Effect of pH**—George Karabourniotis*, Yiannis Manetas, and Nikos A. Gavalas

303 **Role of Calmodulin Inhibition in the Mode of Action of Ophiobolin A**—Pak C. Leung, William A. Taylor, Jerry H. Wang, and Carl L. Tipton*

309 **Osmoregulation in Cotton in Response to Water Stress. III. Effects of Phosphorus Fertility**—Robert C. Ackerson*

313 **Photosynthate Supply and Utilization in Alfalfa. A Developmental Shift from a Source to a Sink Limitation of Photosynthesis**—Chris Baysdorfer* and James A. Bassham

318 **Metabolic Interactions between Spinach Leaf Nitrite Reductase and Ferredoxin-NADP Reductase. Competition for Reduced Ferredoxin**—Chris Baysdorfer and J. Michael Robinson*

321 **Nitrate Inhibition of Legume Nodule Growth and Activity. I. Long Term Studies with a Continuous Supply of Nitrate**—John G. Streeter*

325 **Nitrate Inhibition of Legume Nodule Growth and Activity. II. Short Term Studies with High Nitrate Supply**—John G. Streeter*

329 **Electrogenic Proton Translocation by the ATPase of Sugarcane Vacuoles**—Margaret Thom* and Ewald Komor

335 **Effect of Temperature on H_2 Evolution and Acetylene Reduction in Pea Nodules and in Isolated Bacteroids**—Hans Bertelsen*

339 **Isolation and Antigenic Characterization of Corn Mitochondrial F_1-ATPase**—Vitaly L. Spitsberg, Nancy E. Pfeiffer, Bruce Partridge, Dwane E. Wylie, and Sheldon M. Schuster*

346 **Kinetic Analysis of Corn Mitochondrial F_1-ATPase**—Bruce Partridge, Vitaly L. Spitsberg, Nancy E. Pfeifer, and Sheldon M. Schuster*

352 **Characterization of Anion Effects on the Nitrate-Sensitive ATP-Dependent Proton Pumping Activity of Soybean (*Glycine max.* L.) Seedling Root Microsomes**—Roger R. Lew* and Roger M. Spanswick

358 **Synthesis and Degradation of Fructose, 2,6-Bisphosphate in Endosperm of Castor Bean Seedlings**—Nicholas J. Kruger and Harry Beevers*

365 **Uptake and Reduction of [^{15}N]Nitrate by Intact Soybean Plants in the Dark**—Joseph C. Nicholas and James E. Harper*

370 **Phosphorylation of Wheat Germ Initiation Factors and Ribosomal Proteins**—Karen S. Browning, Tyan Fuh J. Yan, Stephen J. Lauer, Lu Ann Aquino, Mariano Tao, and Joanne M. Ravel*

374 **Glucose and Glycine Metabolism in Regenerating Tobacco Protoplasts. Followed Nondestructively by Nuclear Magnetic Resonance Spectroscopy**—Michal Neeman*, Dvora Aviv, Hadassa Degani, and Esra Galun

379 **Regulation of NO_3^- Influx in Barley. Studies Using**

$^{13}NO_3$—Anthony D. M. Glass*, Robert G. Thompson, and Lucien Bordeleau

382 **Nitrogen Nutrition and Metabolic Interconversions of Nitrogenous Solutes in Developing Cowpea Fruits**—Mark B. Peoples, Craig A. Atkins, John S. Pate*, and David R. Murray

389 **Topography of the Protein Complexes of the Chloroplast Thylakoid Memrane. Studies of Photosystem I Using a Chemical Probe and Proteolytic Digestion**—William Ortiz, Eric Lam, Susan Chollar, Debbie Munt, and Richard Malkin*

398 **Putrescine Uptake in *Saintpaulia* Petals**—Nello Bagni* and Rossella Pistocchi

403 **Peptide Alcohols as Promoters of Nitrate and Ammonium Ion Uptake in Plants**—Willy Lin* and James C. Kauer

407 **Promotion by Ethylene of the Capability to Convert 1-Aminocyclopropane-1-carboxylic Acid to Ethylene in Preclimacteric Tomato and Cantaloupe Fruits**—Yu Liu, Neil E. Hoffman, and Shang Fa Yang*

412 **Glutamine Transfer from Xylem to Phloem and Translocation to Developing Leaves of *Populus deltoides***—Richard E. Dickson*, Thomas C. Vogelmann, and Philip R. Larson

418 **Comparative Distribution and Metabolism of Xylem-Borne Amino Compounds and Sucrose in Shoots of *Populus deltoides***—Thomas C. Vogelmann, Richard E. Dickson*, and Philip R. Larson

429 **Potassium Transport in Corn Roots. III. Pertubation by Exogenous NADH and Ferricyanide**—Leon V. Kochian and William J. Lucas*

437 **Characterization of a Selenium-Independent glutathione Peroxidase from *Euglena gracilis***—Julie M. Overbaugh and Ray Fall*

443 **Sensitivity of Carrot Cell Cultures and RNA Polymerase II to Amatoxins. Evidence for the Inactivation of 6′-Hydroxyamatoxins**—Michael C. Little and James F. Preston, III*

450 ***In Vivo* Regulation of *De Novo* Methione Biosynthesis in a Higher Plant (*Lemna*)**—John Giovanelli*, S. Harvey Mudd, and Anne H. Datko

456 **Stomatal Limitation to Carbon Gain in *Paphiopedilum* sp. (*Orchidaceae*) and Its Reversal by Blue Light**—Eduardo Zeiger*, C. Grivet, Sarah M. Assmann, Gerald F. Deitzer, and M. W. Hannegan

461 **Stomatal Responses to CO_2 in *Paphiopedilum* and *Phragmipedium*. Role of the Guard Cell Chloroplast**—Sarah M. Assman and Eduardo Zeiger*

465 **A Model for HCO_3^- Accumulation and Photosynthesis in the Cyanobacterium *Synechococcus* sp. Theoretical Predictions and Experimental Observations**—Murray R. Badger*, Mary Bassett, and Hugh N. Comins

472 **Simulation of Dehydration Injury to Membranes from Soybean Axes by Free Radicals**—Tissa Senaratna, Bryan D. McKersie*, and Robert H. Stinson

475 **Gravitropic Responses of Partially Decapitated Corn Coleoptiles with and without Applied [^{14}C]Indoleacetic Acid**—Ronald D. Hatfield* and Clifford E. LaMotte

SHORT COMMUNICATIONS

481 **Reversal of Chlorsulfuron-Induced Inhibition of Mitotic Entry by Isoleucine and Valine**—Thomas L. Rost* and Thomas Reynolds

483 **Extinction Coefficients of Chlorophyll *a* and *b* in *N*′,*N*-Dimethylformamide and 80% Acetone**—William P. Inskeep* and Paul R. Bloom

486 ***Viviparous*-1 Mutation in Maize Conditions Pleiotropic Enzyme Deficiencies in the Aleurone**—Hugo K. Dooner*

489 **Light and Temperature Regulation of Early Morning Crassulacean Acid Metabolism in *Opuntia erinacea* var Columbiana (Griffiths) L. Benson**—Robert O. Littlejohn* and Maurice S. B. Ku

492 **Further Evidence that Cytoplasmic Acidosis Is a Determinant of Flooding Intolerance in Plants**—Justin K. M. Roberts*, Fernando H. Andrade, and Irvin C. Anderson

495 **Posttranslational Processing of Proteins in Vacuoles and Protein Bodies Is Inhibited by Monensin**—Hetty M. Stinissen*, Willy J. Peumans, and Maarten J. Chrispeels

499 **^{13}C Nuclear Magnetic Resonance Study of Mannitol Cycle and Trehalose Synthesis during Glucose Utilization by the Ectomycorrhizal Ascomycete *Cenococcum graniforme***—Francis Martin*, Daniel Canet, and Jean Pierre Marchal

503 **Action Spectrum of the Activity of Acifluorfen-methyl, a Diphenyl Ether Herbicide, in *Chylamydomonas eugametos***—Michael P. Ensminger and F. Dan Hess*

506 **Diurnal Variation of Asparaginase in Developing Pea Leaves**—Konrad Siechiechowicz*, Robert J. Ireland, and Kenneth W. Joy

509 **Fermentative Metabolism of *Chlamydomonas reinhardtii*. II. Role of Plastoquinone**—Rene P. Gfeller and Martin Gibbs

Number 3. March

513 **Isolation of Amyloplasts from Developing Maize Endosperm**—Ed Echeverria, Charles Boyer, Kang-Chien Liu, and Jack Shannon*

520 **Glutamine Metabolism in Corn Kernels Cultured *In Vitro***—Santosh Misra and Ann Oaks*

524 **Sugar Efflux from Maize (*Zea mays* L.) Pedicel Tissue**—Gregory A. Porter, Daniel P. Knievel*, and Jack C. Shannon

532 **A Developmentally Regulated Hydroxyproline-Rich Glycoprotein from the Cell Walls of Soybean Seed Coats**—Gladys I. Cassab, Jorge Nieto-Sotelo, James B. Cooper, Gerrit-Jan van Holst, and Joseph E. Varner*

536 **Effects of Aminooxyacetate and Aminoacetonitrile on Glycolate and Ammonia Release by the Cyanobacterium *Anabaena cylindrica***—Birgitta Bergman*, Eva Renström, Lars Hällbom, and Geoffrey A. Codd

540 **Inhibition of Phytochrome Synthesis by Gabaculine**—Gary Gardner* and Holly L. Gorton

544 **Chitosan-Elicited Callose Synthesis in Soybean Cells as a Ca^{2+}-Dependent Process**—Harald Köhle, Wolfgang Jeblick, Frauke Poten, Wolfgang Blaschek, and Heinrich Kauss*

552 **Rapid Suppression of Extension Growth in Dark-Grown Wheat Seedlings by Red Light**—Wilfrid Bleiss and Harry Smith*

556 **Sexual Interaction in Heterothallic Strains of *Closterium peracerosum-strigosum-littorale*. Partial Characterization of a Male-Specific Sexual Pheromone, Pro-**

toplast-Releasing Substance—Atsushi Kato and Kimiko Sasaki*

560 **Nitrate Uptake and Partitioning by Corn Root Systems. Differential Effects of Ammonium among Genotypes and Stages of Root Development**—William L. Pan*, William A. Jackson, and Robert H. Moll

567 **Epicuticular Lipid Accumulation on the Leaves of *Lycopersicon pennellii* (Corr.) D'Arcy and *Lycopersicon esculentum* Mill**—Jon F. Fobes*, J. Brian Mudd, and Margery P. F. Marsden

571 **Purification and Characterization of the Pea Chloroplast Pyruvate Dehydrogenase Complex. A Source of Acetyl-CoA and NADH for Fatty Acid Biosynthesis**—Pamela J. Camp and Douglas D. Randall*

578 **Reduced Apparent Photorespiration by the C_3-C_4 Intermediate Species, *Moricandia arvenis and Panicum milioides***—Gabriel P. Holbrook, Douglas B. Jordan, and Raymond Chollet*

584 **Reversal of the Effects of Aging in Soybean Seeds**—Robert L. Tilden and Sherlie H. West*

587 **Protein Metabolism in Senescing Wheat Leaves. Determination of Synthesis and Degradation Rates and Their Effects on Protein Loss**—Lorenzo Lamattina, Rafael Pont Lezica*, and Rubén D. Conde

591 **Quantitative Localization of the Phytoalexin Glyceollin I in Relation to Fungal Hyphae in Soybean Roots Infected with *Phytophthora megasperma* f. sp. glycinea**—Michael G. Hahn, Anne Bonhoff, and Hans Grisebach*

602 **Evaluation of a System for the Imposition of Plant Water Stress**—Michael D. Snow* and David T. Tingey

608 **Stabilization of Pyruvate, Pi Dikinase Regulatory Protein in Maize Leaf Extracts**—Gianni R. Baer and Larry E. Schrader*

612 **Relationships between CO_2 Exchange Rates and Activities of Pyruvate, Pi Dikinase and Ribulose Bisphosphate Carboxylase, Chlorophyll Concentration, and Cell Volume in Maize Leaves**—Gianni R. Baer and Larry E. Schrader*

617 **Starch and Sucrose Synthesis in *Phaseolus vulgaris* as Affected by Light, CO_2, and Abscisic Acid**—Thomas D. Sharkey*, Joseph A. Berry, and Klaus Raschke

621 **Host Recognition in the *Rhizobium*-Soybean Symbiosis. Evidence for the Involvement of Lectin in Nodulation**—Larry J. Halverson and Gary Stacey*

626 **Characterization of a Purified Photosystem II-Phycobilisome Particle Preparation from *Porphyridium cruentum***—Barabara M. Chereskin, Jenny D. Clement-Metral, and Elisabeth Gantt*

630 **Production of a Lectin in Tissue Cultures of *Dolichos biflorus***—Douglas W. James, Jr., Mridul Ghosh, and Marilynn E. Etzler*

635 **Cytokinin Metabolism in *Phaseolus* Embryos. Genetic Difference and the Occurrence of Novel Zeatin Metabolites**—Yun-Hwa Lee, Machteld C. Mok, David W. S. Mok*, Donald A. Griffin, and Gordon Shaw

642 **Isolation and Characterization of an Elicitor of Necrosis Isolated from Intercellular Fluids of Compatible Interactions of *Cladosporium fulvum* (Syn. *Fulvia fulva*) and Tomato**—Pierre J. G. M. De Wit*, Ans E. Hofman, Grardy C. M. Velthuis, and Joseph A. Kuć

648 **A Low Molecular Weight Polypeptide Which Accumulates upon Inhibition of Porphyrin Biosynthesis in Maize**—Ayelet Schuster and Eitan Harel*

653 **Photosynthesis, Morphology, Leaf Anatomy, and Cytogenetics of Hybrids between C_3 and C_3/C_4 *Panicum* Species**—R. Harold Brown*, Joseph H. Bouton, Philip T. Evans, Henry E. Malter, and Luanne L. Rigsby

659 **Histochemical Technique. A General Method for Quantitative Enzyme Assays of Single Cell 'Extracts' with a Time Resolution of Seconds and a Reading Precision of Femtomoles**—William H. Outlaw, Jr.*, Stefan A. Springer, and Mitchell C. Tarczynski

667 **Diurnal Regulation of Phosphoenolpyruvate Carboxylase from *Crassula***—Min-Xian Wu and Randolph T. Wedding*

676 **Control of Seed Germination by Abscisic Acid. III. Effect on Embryo Growth Potential (Minimum Turgor Pressure) and Growth Coefficient (Cell Wall Extensibility) in *Brassica napus* L.**—Peter Schopfer* and Claudia Plachy

687 **Fucosylation of Membrane Proteins in Soybean Cultured Cells. Effects of Tunicamycin and Swainsonine**—Hidetaka Hori, Gur P. Kaushal, and Alan D. Elbein*

695 **Properties of Ornithine Carbamoyltransferase from *Pisum sativum* L.**—Hans de Ruiter and Chris Kollöffel*

700 **Cell Surfaces in Plant-Microorganism Interactions. V. Elicitors of Fungal and Plant Origin Trigger the Synthesis of Ethylene and of Cell Wall Hydroxyproline-Rich Glycoprotein in Plants**—Dominique Roby, Alain Toppan, and Marie-Thérèse Esquerré-Tugayé*

705 **Changes in Thylakoid Galactolipids and Proteins during Iron Nutrition-Mediated Chloroplast Development**—John N. Nishio, Scott E. Taylor, and Norman Terry*

712 **Effect of Translocation-Hindering Procedures on Source Leaf Photosynthesis in Cucumber**—Maria Luisa Mayoral, Zvi Plaut*, and Leonora Reinhold

718 ***p*-Fluorophenylalanine-Induced Restriction of Ion Uptake and Assimilation by Maize Roots**—M. A. Morgan*, Richard J. Volk, and William A. Jackson

722 **Computer-Assisted Image Analysis of Plant Growth, Thigmomorphogenesis, and Gravitropism**—Mordecai J. Jaffe*, Andrew H. Wakefield, Frank Telewski, Edward Gulley, and Ronald Biro

731 **Analysis of the Effect of Light and Temperature on the Fluence Response Curves for Germination of *Rumex obtusifolius***—Massanori Takaki, Gerda H. Heeringa, John W. Cone, and Richard E. Kendrick*

735 **Ribulose Bisphosphate Carboxylase/Oxygenase Content Determined with [^{14}C]Carboxypentitol Bisphosphate in Plants and Algae**—Akiho Yokota* and David T. Canvin

740 **Phosphatidylglycerol and Chilling Sensitivity in Plants**—P. Grattan Roughan*

747 **Biosynthesis and Intracellular Transport of 11S Globulin in Developing Pumpkin Cotyledons**—Ikuko Hara-Nishimura*, Mikio Nishimura, and Takashi Akazawa

753 **Differential Control of Ethylene-Induced Gene Expression and Respiration in Carrot Rotts**—Scott E. Nichols and George G. Laties*

758 **Functional Characterization and Partial Purification of the Ubiquinol-Cytochrome *c* Oxidoreductase from Higher Plant Mitochondria (*Helianthus tuberosus*)**—Mauro Degli Esposti, Emanuela Flamini, and Davide Zannoni*

765 **Isoelectric Focusing of Plant Cell Protoplasts. Separation of Different Protoplast Types**—Lawrence R. Griffing*, Adrian J. Cutler, Peter D. Shargool, and Larry C. Fowke

770 **Uptake of Amino Acids and Other Organic Compounds by *Lemna paucicostata Hegelm.* 6746**—Anne H. Datko* and S. Harvey Mudd

779 **Ureide Metabolism in Leaves of Nitrogen-Fixing Soybean Plants**—Barry J. Shelp* and Robert J. Ireland

SHORT COMMUNICATIONS

784 **Natural Occurrence of Indole-3-acetylaspartate and Indole-3-acetylglutamate in Cucumber Shoot Tissue**—James M. Sonner and William K. Purves*

786 **Inhibition of Glycine Oxidation by Carboxymethoxylamine, Methoxylamine, and Acethydrazide**—G. Sarojini and David J. Oliver*

790 **Correction**

Number 4. April

791 **Characterization of Glutamine Synthetase Isoforms from *Chlorella***—Rob F. Beudeker and F. Robert Tabita*

795 **Nuclear, Virescent Mutants of *Zea mays* L. with High Levels of Chlorophyll (*a*/*b*) Light-Harvesting Complex during Thylakoid Assembly**—Mary L. Polacco*, M. T. Chang, and M. Gerald Neuffer

801 **Metabolism of Monoterpenes. Evidence for the Function of Monoterpene Catabolism in Peppermint (*Mentha piperita*) Rhizomes**—Rodney Croteau* and Virendar K. Sood

807 **Changing Kinetic Properties of Fructose-1,6-bisphosphatase from Pea Chloroplasts during Photosynthetic Induction**—Ivano A. Marques and Louise E. Anderson*

811 **Influence of Photosynthesis and Chlorophyll Synthesis on Polypeptide Accumulation in Greening *Euglena***—Antonio F. Monroy and Steven D. Schwartzbach*

817 **Dual Action of Respiratory Inhibitors. Inhibition of Germination and Prevention of Dormancy Induction in Lettuce**—Anwar A. Khan* and Guang-Wen Zeng

824 **Polar Transport of Auxin across Gravistimulated Roots of Maize and Its Enhancement by Calcium**—June S. Lee and Michael L. Evans*

828 **Immunological Determination of Phosphoenolpyruvate Carboxylase and the Large and Small Subunits of Ribulose 1,5-Bisphosphate Carboxylase in Leaves of the C_4 Plant Pearl Millet**—Carole L. Bassett, Claire A. Rinehart, and James R. Y. Rawson*

833 **Nodule-Specific Polypeptides from Effective Alfalfa Root Nodules and from Ineffective Nodules Lacking Nitrogenase**—Naomi Lang-Unnasch* and Frederick M. Ausubel

840 **Biosynthesis of Mannose-Containing Lipid-Linked Oligosaccharides by Solubilized Enzyme Preparation from Cultured Soybean Cells**—Hidetaka Hori, Gur P. Kaushal, and Alan D. Elbein*

847 **An Analysis of Growth Regulator Interactions and Gene Expression during Auxin-Induced Cell Elongation Using Cloned Complementary DNAs to Auxin-Responsive Messenger RNAs**—John C. Walker*, Jolanta Legocka, Leonard Edelman, and Joe L. Key

851 **Photorespiration-Induced Reduction of Ribulose Bisphosphate Carboxylase Activation Level**—Chris J. Chastain and William L. Ogren*

857 **Separation of the Mg^{2+}-ATPases from the Ca^{2+}-Phosphatase Activity of Microsomal Membranes Prepared from Barley Roots**—Frances M. DuPont* and William J. Hurkman

863 **Sucrose Concentration at the Apoplastic Interface between Seed Coat and Cotyledons of Developing Soybean Seeds**—Roger M. Gifford* and John H. Thorne

869 **Shoot Turgor Does Not Limit Shoot Growth of NaCl-Affected Wheat and Barley**—Annie Termaat, John B. Passioura, and Rana Munns*

873 **Evidence for a Plasmalemma Redox System in Sugarcane**—Margaret Thom* and Andrew Maretzki

877 **Effects of Low Temperature and Respiratory Inhibitors on Calcium Flux in Plant Mitochondria**—Ian B. Ferguson, Michael S. Reid, and Roger J. Romani*

881 **ADP Is a Competitive Inhibitor of ATP-Dependent H^+ Transport in Microsomal Membranes from *Zea mays* L. Coleoptiles**—Thomas Rausch*, Martina Ziemann-Roth, and Willy Hilgenberg

886 **Accumulation and Subcellular Localization of α-Galactosidase-Hemagglutinin in Developing Soybean Cotyledons**—Eliot M. Herman* and Leland M. Shannon

891 **Ethylene Promotes the Capability to Malonylate 1-Aminocyclopropane-1-carboxylic Acid and D-Amino Acids in Preclimacteric Tomato Fruits**—Yu Liu, Ling-Yuan Su, and Shang Fa Yang*

896 **Naringin Levels in Citrus Tissues. I. Comparison of Different Antibodies and Tracers for the Radioimmunoassay of Naringin**—Pablo S. Jourdan, Elmar W. Weiler, and Richard L. Mansell*

903 **Naringin Levels in Citrus Tissues. II. Quantitative Distribution of Naringin in *Citrus paradisi* MacFad.**—Pablo S. Jourdan, Cecilia A. McIntosh, and Richard L. Mansell*

909 **Ion Transport Processes in Corn Mitochondria. I. Effect of the Local Anesthetic Dibucaine**—Robert R. Klein* and David E. Koeppe

912 **Mode of Methomyl and *Bipolaris maydis* (race T) Toxin in Uncoupling Texas Male-Sterile Cytoplasm Corn Mitochondria**—Robert R. Klein* and David E. Koeppe

917 **Effect of External pH on the Internal pH of *Chlorella saccharophila***—Katharina A. Gehl and Brian Colman*

922 **Effects of Ethephon, 1-Aminocyclopropane-1-carboxylic Acid, and Inhibitors of Ethylene Synthesis on the Gravitropically Induced Movement of *Mimosa pudica* Pulvinus**—Gabriel Roblin* and Jean-Michel Pérault

926 **Determination of Endogenous Indole-3-acetic Acid in *Plagiochila arctica* (Hepaticae)**—David M. Law*, Dominick V. Basile, and Margaret R. Basile

930 **Controls on $^{22}Na^+$ Influx in Corn Roots**—Benjamin Jacoby and John B. Hanson*

935 **Metabolic Basis for Injury to Plants from Combinations of O_3 and SO_2. Studies with Modifiers of Pollutant Toxicity**—David M. Olszyk* and David T. Tingey

940 **Seed Germination in *Chenopodium album* L. Relation-**

ships between Nitrate and the Effects of Plant Hormones—Hargurdeep S. Saini, Pawan K. Bassi, and Mary S. Spencer*

944 **Water Stress Reduces Ozone Injury via a Stomatal Mechanism**—David T. Tingey* and William E. Hogsett

948 **Mutants of Sweetclover (*Melilotus alba*) Lacking Chlorophyll *b*. Studies on Pigment-Protein Complexes and Thylakoid Protein Phosphorylation**—John P. Markwell*, Andrew N. Webber, and Bridget Lake

952 **Identification and Quantification of Indole-3-methanol in Etiolated Seedlings of Scots Pine (*Pinus sylvestris* L.)**—Björn Sundberg, Göran Sandberg*, and Einar Jensen

956 **Chloroplast Function in Guard Cells of *Vicia faba* L. Measurement of the Electrochromic Absorbance Change at 518 nm**—David A. Grantz,* Thomas Graan, and John S. Boyer

963 **Translocation of Photosynthates into Vacuoles in Spinach Leaf Protoplasts**—Sumio Asami, Ikuko Hara-Nishimura, Mikio Nishimura*, and Takashi Akazawa

969 **Stimulation of Ethylene Production in Bean Leaf Discs by the Pseudomonad Phytotoxin Coronatine**—I. B. Ferguson* and R. E. Mitchell

974 **Bicarbonate-Reversible and Irreversible Inhibition of Photosystem II by Monovalent Anions**—Alan Stemler* and Judith B. Murphy

978 **Anaerobic Stress in Germinating Castor Bean, Ethanol Metabolism, and Effects on Subcellular Organelles**—Robert P. Donaldson*, Patricia Soochan, and Alexander Zaras

984 **Paraquat Resistance in *Conyza***—E. Patrick Fuerst, Herbert Y. Nakatani, Alan D. Dodge, Donald Penner, and Charles J. Arntzen*

990 **Spectral Characterization and Proteolytic Mapping of Native 120-Kilodalton Phytochrome from *Cucurbita pepo* L.**—Richard D. Vierstra* and Peter H. Quail

999 **Enzyme Regulation in C_4 Photosynthesis. Identification and Localization of Activities Catalyzing the Synthesis and Hydrolysis of Fructose 2,6-Bisphosphate in Corn Leaves**—Jürgen Soll, Christiane Wötzel, and Bob B. Buchanan*

1004 **Intercellular Nodule Localization and Nodule Specificity of Xanthine Dehydrogenase in Soybean**—Eric W. Triplett*

SHORT COMMUNICATIONS

1010 **Isolation of Mitochondria from Soybean Leaves on Discontinuous Percoll Gradients**—Terry C. Hrubec, J. Michael Robinson, and Robert P. Donaldson*

1013 **Phosphate Transport across the Plasma Membrane of Wheat Leaf Protoplasts. Characteristics and Inhibitor Specificities**—Alan H. Goldstein* and Andre D. Hunziker
